[Restoration ecology - Wikipedia](#)

Restoration ecology is the scientific study supporting the practice of ecological restoration, which is the practice of renewing and restoring degraded, damaged, or destroyed ecosystems and habitats in the environment by active human intervention and action. Many people recognize that biodiversity has an intrinsic value and that we have a responsibility to conserve it for future generations.

Restoration economy - Wikipedia

The restoration economy is the economic activity associated with regenerative land use, such as ecological restoration activities. It stands in contrast to economic activity premised on sprawl, or on the extraction or depletion of natural resources. The term is meant to convey that activities meant to repair past damage to natural and human communities are often economically beneficial at local
